---

Web Developer with 2+ years of experience creating scalable applications. Successfully delivered e-commerce platforms and social media clones, improving system performance by 25%. Passionate about integrating secure REST APIs and delivering responsive designs.

## SKILLS

---

HTML, CSS, JavaScript, Django, PostgreSQL, MySQL, Git, Debugging, Responsive Design, REST API Integration

## WORK EXPERIENCE

---

### Freelance

Jan 2022 - Present

Junior Web Developer

- Delivered 5+ responsive web apps, including e-commerce sites with secure payment systems.
- Collaborated with clients to develop features like user authentication, search filters, and admin dashboards.

## PROJECTS

---

### Facebook Clone

- Developed a scalable social media platform with real-time dynamic newsfeeds.
- Integrated features like comments, replies, and likes, optimizing performance with MySQL.

### E-commerce Website

- Built a responsive online store with secure payments using PayPal and Stripe.
- Designed an intuitive admin dashboard for managing products, orders, and customers.

### Online Car Market

- Created a car listing platform with advanced search and filtering feature using Django, jquery.
- Implemented secure user authentication with seller ratings using Django and MySQL.

### Portfolio Website

- Designed a personal portfolio website with HTML, CSS, and JavaScript and Django
- Applied responsive design with Flexbox for optimal performance.

### Blog Website

- Designed and developed a fully functional blog website with a user-friendly interface
- Used Django's admin interface for backend management of posts and user activities.
